## INTRODUCTION

---

The primary purpose of this Responsible Sourcing (RS) Supplier manual is to establish and outline The Home Depot's (THD) compliance program policies and procedures related to the Responsible Sourcing Standards (Standards) – See Exhibit 1. The RS Supplier Manual is intended to be the primary reference document to help Suppliers manage compliance with the Standards.

The RS Supplier Manual applies to organizations providing products to THD (Suppliers) and factories producing the related products including factories producing products directly for THD (collectively, Factories).

THD expects our Suppliers and Factories to follow our Standards as outlined in the RS Supplier Manual. We understand that fully complying with these standards may be challenging for some factories; however, it is the goal of THD to work with factories that are transparent and committed to continuous social and environmental improvement. THD is committed to a policy of "Remediation not Termination", however, factories that fail to be transparent or fail to respond to outstanding compliance issues will be terminated.

---

## **ROLES AND RESPONSIBILITIES**

---

### **I. RESPONSIBILITIES AND POLICIES OF THE HOME DEPOT**

THD is dedicated to ensuring adherence with the Standards. All activities associated with Standards compliance will be managed by THD RS Team under the direction of an appointed Responsible Sourcing leader. THD RS Team will be responsible for informing all Suppliers, which includes Factories, of THD's compliance requirements and expectations.

THD's VP of Sustainability/RS and Director of RS have joint authority to determine the appropriate sanctions for a factory or supplier. At the discretion of the VP of Sustainability/RS, the Emerging Issues Council (EIC) (which is comprised of senior executives from various departments throughout the company) may be requested to determine the appropriate sanctions for any critical or repeated violations at a specific Factory or Supplier.

To manage compliance with the Standards, THD RS Team will be responsible for the following:

#### **A. Training and Communication**

The Home Depot RS Team will be responsible for conducting/coordinating Standards compliance training (See Ongoing Compliance Efforts). In addition, The Home Depot RS Team will serve as the primary contact within THD for compliance related information with factories that produce products offered for sale by THD.

#### **B. Factory Audits**

The Home Depot RS Team will be responsible for the coordination of external factory audits (See Ongoing Compliance Efforts). The Home Depot RS Team will engage the services of audit service providers and coordinate the efforts of trained, credentialed internal resources.

#### **C. Remediation Management**

The Home Depot RS Team will be responsible for oversight of remediation efforts managed by the audit service providers and undertaken by Suppliers and Factories to address issues identified through THD's compliance management efforts including factory audits – (See Remediation and Termination).

#### **D. Investigation and Response to Identified Standards Issues Outside of the Audit Population**

To the extent THD is made aware of allegations or instances of noncompliance with the provisions of the Standards in factories or operations outside of the audit population The Home Depot RS Team will undertake an investigation into the allegation/issue and determine the nature and extent of noncompliance. To the extent The Home Depot RS Team is able to confirm noncompliance with the Standards and depending on the severity of the noncompliance, The Home Depot RS Team will work with the responsible Supplier or Factory to remediate the identified noncompliance and take appropriate measures to ensure the issue will not recur.

### **II. RESPONSIBILITIES OF SUPPLIERS**

#### **A. Responsible Official**

Each Supplier will designate an official who will be responsible for supervising the Supplier's efforts to ensure Factories utilized by the Supplier are in compliance with the Standards. Each Supplier will promptly notify The Home Depot RS Team of any change in the identity of its official designated for this purpose.

#### **B. Identification of Factories**

Suppliers are responsible for reporting all factories used for the production of products provided to THD. As part of the periodic factory audit process, all Suppliers must provide THD with an updated listing of the Factories being used to produce products for The Home Depot and only Factories approved by The Home Depot RS Team can be utilized for the production of applicable products. Suppliers are also responsible for reporting and registering any new subcontractors in THD Flex System within 15 days after business relationship is established. For all new programs, any subcontractors being utilized should be added into THD Flex System at the time of onboarding.

#### **C. Information and Training**

The Standards and the Definitions of Key Standards Terms (Exhibits 1 and 2) outline THD's expectations related to the conditions under which products provided to THD are manufactured. In addition, all Suppliers are encouraged to seek any needed guidance from The Home Depot RS Team on how to ensure their Factories and the related individual compliance efforts meet THD's expectations. THD may request the attendance of management from the Supplier and/or Factories at seminars presented by THD or outside parties to assist in their understanding and adhering to THD's compliance expectations. In addition, Suppliers are responsible for ensuring the Factories utilized in the production of products provided to THD have received and understand the Standards and the related requirements.

#### **D. Compliance Management Support**

In connection with THD's compliance management efforts, THD will utilize factory audits to confirm compliance with THD's expectations. Suppliers will not interfere with or discourage communication with THD personnel or THD's representatives. Suppliers will encourage factory management to permit THD personnel and THD's representatives to conduct all audit procedures including interviews of employees without the presence of other employees or management.

Suppliers are responsible for the costs associated with THD's factory audit efforts. Suppliers are expected to pay for the costs of announced audits directly in a timely manner and facilitate the timely performance of all audits. Failure to pay for the audits may result in an offset of the Suppliers account by THD.

#### **E. Remediation**

Suppliers are expected to support efforts to ensure compliance issues are addressed by factory management at the Factories. In certain instances, THD may request Supplier representatives confirm remediation of identified issues (See Ongoing Compliance Efforts).

It is the responsibility of each supplier to ensure that the factories utilized to produce products for The Home Depot are compliant with the Standards. Suppliers who fail to meet the guidelines in this manual may be subject to termination of their business relationship with The Home Depot. (Refer to The Home Depot Termination Guidelines for details. (Exhibit 3))

### III. RESPONSIBILITIES OF FACTORIES

#### A. Responsible Official

Each Factory will designate an official who will be responsible for supervising the Factory's efforts to ensure they are in compliance with the Standards. Each Factory will promptly notify The Home Depot RS Team of any change in the identity of its official designated for this purpose.

#### B. Standards and Applicable Law

All Factories are expected to maintain, review, and comply with the Standards (Exhibit 1). Factories should understand the laws and regulations related to age, wage, hours of work and health and safety.

#### C. Compliance Management Support

Factories must meet the following monitoring and compliance obligations:

##### 1. Non-interference

Factory management will not interfere with, discourage or punish employees who communicate with THD's representatives. Factory management will permit THD and THD's audit service providers to interview employees without the presence of other employees or management, and will not disturb the confidentiality of any employee interview.

##### 2. Ethical Performance

Factory representatives will not offer any incentives including gifts, meals, transportation or money to THD's personnel and/or representatives in an effort to influence the results of an audit. To the extent factory representatives offer incentives of any kind to THD's representatives, this fact will be immediately reported to THD. THD considers offers of incentives a serious issue and any such offer will have a significant adverse impact on Factories' business relationships with THD.

To the extent THD's representatives solicit any form of incentive from the factory, this should be immediately reported to The Home Depot RS Team.

##### 3. Transparency

All Factories are expected to maintain and present to THD personnel and THD's representatives true and accurate records reflecting compliance with the Standards. Failure to be transparent is a serious issue and will have a significant adverse impact on Factories' business relationships with THD.

##### 4. Employee Awareness and Education

Each Factory is responsible for the communication to its employees regarding the Factory's obligation to them, and to THD, in accordance with the Standards.

##### 5. Recordkeeping

Factories will maintain on-site documentation necessary to demonstrate compliance with the Standards including records of the names, ages, hours worked and wages and benefits paid for each employee for at least the preceding one-year period. Factories will make such records immediately available (while auditor is on-site or within 24 hours if request is external) to THD or its representatives upon request.

##### 6. Corrective Action

Factories are expected to correct all non-compliance as a condition of continued business. Factories are expected to develop Corrective and Preventive Action (CAPA) plans to address identified non-compliance in a timely manner. All CAPA Plans are expected to be closed within the agreed upon days from the date of THD RS Team's approval. In the event that a Factory fails to correct the deficiencies in the expected timeframe, THD will place the factory into "Non-compliance" status and no new purchase orders will be given to the factory. If the factory remains in the "Non-compliance" status for 60 days they will be automatically terminated. (Refer to The Home Depot Termination Guidelines for details. (Exhibit 3))

- D. Factories that meet the definition of a Subcontractor per THD RS definition should take the same responsibilities as THD primary factories.** (For details refer to New Factory Engagement – On-Boarding, Section IV Subcontracting)

---

## SUPPLIER/ FACTORY ENGAGEMENT

---

### I. NEW FACTORIES

#### A. Factory Audits

The Home Depot RS Team may require selected Factories to be evaluated through a factory audit as an element of the on-boarding process. The audit will be performed consistent with The Home Depot's Factory Audit Protocols (See Ongoing Compliance Efforts). Both the supplier and factory will receive The Home Depot Responsible Sourcing Supplier Manual with the SP audit scheduling notification. Based upon the results of the audit, The Home Depot RS Team or its representatives will provide the Factory with any necessary corrective actions. If the Factory meets the requirements outlined in this manual, The Home Depot RS Team will approve the Factory for production. The approval of the Factory will be communicated to the responsible Supplier or responsible THD representative, as applicable.

---

## ONGOING COMPLIANCE EFFORTS

---

### I. TRAINING AND COMMUNICATION

The Home Depot RS Team will organize periodic factory compliance training for representatives from Suppliers and Factories. The primary purpose of the training programs is to educate and communicate the Standards compliance expectations to the Factories and Suppliers. Both the supplier and factory will also receive The Home Depot Responsible Sourcing Supplier Manual with the SP audit scheduling notification for each RESA audit.

The Home Depot RS team provides the following free training options so that suppliers and factories can easily participate and get the most updated information regarding THD RS standards and process:

- On-site training (in THD Shanghai and Shenzhen offices every month alternatively)
- Online training via the website: <https://vendor-thdrs.talentlms.com/catalog/index> (For vendor)  
<https://factory-thdrs.talentlms.com/catalog/index> (For factory)
- All new factories, factories who received a C/F grade in their last audit, and related suppliers are required to complete either the on-site training or the online training, and provide a training certificate to the SP before each audit

### II. COMPLIANCE MANAGEMENT

In order to assess compliance with the Standards, THD will undertake steps to confirm compliance with the provisions of the Standards. In addition to the certification process outlined above, THD's compliance management will be comprised of the performance of on-site factory audits. (See grading below in Section III – Remediation and Termination)

#### A. External Factory Audits

The Home Depot RS Team may engage a social compliance audit firm(s). Auditors will be responsible for executing independent audits consistent with THD's audit protocols. In 2017, THD implemented the Retail Ethical Sourcing Assessment (RESA) template for all THD RS audits. RESA is a single audit template developed in partnership with Lowe's. The goal is to avoid

imposing added cost of conducting multiple audits where the same factories are being used by THD and Lowe's.

**(i) Audit Execution**

THD's external audits will include periodic audits of Factories, Specific Response audits, and On-Boarding Audits (See New Factory Engagement – On-Boarding).

**a. Periodic Audits**

Factories will be subject to periodic audits based on the results of the previous initial audit. The timing of periodic audits based on the previous initial audit result may be as follows:

- ✓ Grade A – Two (2) years from the CAPA closure\* (if CAPA is required) or most recent audit date (if no CAPA required or factory enters “Non-compliance” status for not closing CAPA within required timelines.)
- ✓ Grade B – One (1) year from CAPA closure or most recent audit date (if factory enters “Non-compliance” status for not closing CAPA within required timelines.)
- ✓ Grade C – Six (6) months from CAPA closure or most recent audit date (if factory enters “Non-compliance” status for not closing CAPA within required timelines.)
- ✓ Grade F – Factory is required to undertake the Transparency and Improvement Program (TIP) (Exhibit 8). New audit required six (6) months from the date of the audit. At that time the Factory is expected to achieve a grade C or higher.

\*THD reserves the right to audit more frequently at their discretion.

**b. Specific Response Audits**

On a periodic basis, THD may become aware of issues or allegations of noncompliance at factories producing products for THD. Based on the nature of the issues or allegations, The Home Depot RS Team may coordinate an audit or engage an external auditor to perform the audit. These audits will be conducted on an immediate basis, with special consideration for the identified issues or allegations.

Based on the nature of the issues and allegations, specific response audits may be performed on an unannounced basis.

**B. Use of Current Factory Audit Reports**

THD will consider waiving the initial audit requirement for a Supplier or Factory with an audit existing report, provided all of the following conditions are met:

1. RESA audit performed for other retailers. At the time of audit scheduling, suppliers need to inform The Home Depot's appointed 3<sup>rd</sup> party service provider within 3 calendar days if an audit conducted by Lowe's using the RESA template is on file. If so, The Home Depot will obtain a copy of the audit report and all relevant corrective action related documents from Lower's directly and not conduct an additional RS audit.)
2. Suppliers/factories wishing to use an existing report are required to provide the report to THD RS team within 3 calendar days from date of audit notification.
3. Audit was performed by a THD recognized provider:
  - ✓ Bureau Veritas
  - ✓ Intertek
  - ✓ SGS
  - ✓ UL
  - ✓ TUV
  - ✓ Other, as determined by THD in its sole discretion

4. The initial audit was performed within the prior 12 months.
5. The report converts into a grade of “B” or higher on THD’s grading system.
6. The Supplier or Factory must contact the service provider who conducted the audit and request the Service Provider forward the final report directly to THD. THD will not accept reports directly from a Supplier/Factory.
7. The Supplier or Factory must demonstrate that a strong CAPA plan was implemented, if applicable. If remediation was not finalized, a strong CAPA plan with clear timelines must be presented to THD.

To the extent THD accepts the audit report THD will approve the factory consistent with the initial grade (See Remediation and Termination).

### III. REMEDIATION AND TERMINATION

THD is committed to working with approved Factories to address non-compliance with the Standards. Factories are expected to develop CAPA plans to address identified compliance issues in a timely manner. Factories are expected to correct all identified compliance issues as a condition of continued business. THD’s relationships with Factories that are unable or unwilling to address identified compliance issues may be terminated consistent with The Home Depot Termination Guidelines (Exhibit 3).

Factories are expected to complete and provide their completed CAPA plan to the responsible audit service provider within 7 days in response to all compliance issues identified through THD’s compliance management efforts. The timetable for corrective action will depend on the nature, severity and prevalence of the identified findings. Based on the identified non-compliance, the timetable for corrective action will generally be based upon the Corrective Action Guidelines.

Based on the findings identified during the audit, the Factory will receive one of the following overall ratings based on the most significant findings identified during the audit.

**Grade “A”:** A Grade “A” overall rating indicates there were (i) only minor or no compliance issues identified in the execution of the audit resulting in a score between 95-100; or (ii) through the performance of follow-up audits, all identified compliance issues have been addressed. Factories with a Grade “A” overall rating during an initial audit are approved for THD production for **two years**.

**Grade “B”:** A Grade “B” overall rating is assigned when there are isolated deviations for issues considered Non-Critical as defined in Exhibit 3 which result in an audit score between 80-94. Factories with a Grade “B” overall rating generally are required to have a follow-up audit conducted within **90 days** to evaluate remediation of identified compliance issues. Upon completion of these remediation efforts, Factories with a Grade “B” overall rating are approved for THD production for **one year**.

**Grade “C”:** A Grade “C” overall rating is assigned when there are deviations for issues considered to be Non-Critical as defined in Exhibit 3 which result in an audit score between 65-79. Factories with a Grade “C” overall rating generally are required to have a follow-up audit conducted within **90 days** to evaluate remediation of identified compliance issues. Upon completion of these remediation efforts, Factories with a Grade “C” overall rating are approved for THD production for **6 months**.

**Grade “F”:** A Grade “F” rating is assigned when (i) there are deviations for issues considered to be Non-Critical as defined in Exhibit 3 which result in an audit score below 65; or (ii) there are deviations for issues considered to be Critical as defined in Exhibit 3. If THD proceeds with Factories who score a Grade “F” overall rating, the factory will be

required to enter into THD Transparency and Improvement Program (TIP) and have a follow-up audit conducted upon completion of these remediation efforts to evaluate remediation of identified compliance issues. After a successful follow-up audit, Factories with a Grade “F” will be approved for THD production. Purchase Orders may not be released to these factories until confirmation of entry into TIP and subsequent approval by the RS Team.

#### **A. Critical or Repeated Noncompliance findings**

When requested by THD’s VP of Sustainability/RS, the Emerging Issues Council made up of senior executives within THD will determine the appropriate sanctions for any critical or repeated violations at a specific Factory or Supplier. Where applicable, THD will consider sanctions for the Supplier associated with a Factory found to have critical or repeated violations. However, whenever possible, THD will support the Factory’s timely remediation efforts before resorting to possible termination. (See The Home Depot Termination Guidelines (Exhibit 3))

#### **B. Follow-up Factory Audits**

Follow-up factory audits may be necessary to ensure corrective actions are taken. The Home Depot RS Team will authorize follow-up audits within 30 to 90 days after an initial audit has identified noncompliance. If a Factory has any critical findings, the follow-up will generally be scheduled within 30 days of the initial audit to ensure timely remediation.

#### **C. Events That May Impact the Schedule**

In the event that THD discovers a deficiency (e.g., RS, Quality Assurance, Security/C-TPAT, Etc.) at a Factory during the cycle times stated above, the cycle times will reset based on the results of these new findings.

A factory shipping seasonal products to the Home Depot is expected to receive a RS assessment during the related seasonal project peak production window by either a 3rd party service provider of our choosing or by THD RS team. If audit in peak production window for a factory during the cycle times stated above, the cycle times will reset based on the results of seasonal audit.

## **IV SUBCONTRACTING**

### **A. Definition**

**Subcontractor** – subcontractors in the manufacture of products or product components for The Home Depot are factories, other than the facility identified for the production of a product for The Home Depot, involved in either the final assembly of the product or the manufacture of product components with the logos of any of The Home Depot’s brands.”

**Unauthorized Sub-contractor** – Factories meeting the definition of Subcontractor above who have not been disclosed to The Home Depot and properly assessed prior to producing the items listed in the definition.

### **B. Policy**

All Suppliers must notify Home Depot of subcontractors meeting definition. Each supplier has the responsibility to report and register in THD Flex System any new subcontractors within 15 days after such relationship is established. For all new programs, any subcontractors being utilized should be added to THD Flex System at the time of onboarding.

Penalty system or termination of relationship when unauthorized subcontracting is discovered:

1. First Unauthorized Subcontracting Finding:
  - ✓ \$10,000 fine for Mvenders with COGs between \$0 and \$5M
  - ✓ \$25,000 fine for Mvenders with COGs between \$5M and \$50M

- ✓ \$50,000 fine for Mvenders with more than \$50M in COGs
- 2. Second Unauthorized Subcontracting Finding:
  - ✓ \$25,000 fine for Mvenders with COGs between \$0 and \$5M
  - ✓ \$50,000 fine for Mvenders with COGs between \$5M and \$50M
  - ✓ \$100,000 fine for Mvenders with more than \$50M in COGs
- 3. Third Unauthorized Subcontracting Finding:
  - ✓ Automatic Termination of the Vendor

C. THD Private Brand List (Examples as below but not exclusively)

HAMPTON BAY

VISSANI

DECKMATE

StyleWell

Anvil

Stonemark The Company Store

Designer's Touch

ProPlus

PremierPlus

LEGEND

SELECT

#### D. Subcontractor Example

Factory A, final assembly factory: Yes

Factory B, producing product components with THD brand: Yes

Factory C, producing product components without THD brand: No

For additional guidance please refer to the *Packaging and Printing Clarification Document (Exhibit 7)*.

---

## RESPONSIBLE SOURCING STANDARDS

---

The Home Depot and its affiliates, divisions, and subsidiaries strive to conduct business in a responsible manner. As we expand our business activities and work with suppliers domestically and globally to meet customers' needs, it is important to preserve our collective commitment to human rights and safety in the workplace.

The Home Depot expects that all suppliers will abide by all applicable international and local laws, rules and regulations in the manufacture and distribution of merchandise or services provided to The Home Depot. All suppliers are strongly encouraged to exceed The Home Depot's guidelines and promote continuous improvement throughout their operations.

All suppliers must be able to demonstrate compliance with these requirements at the request of The Home Depot.

These guidelines provide an introduction to the minimum requirements that all Suppliers must meet in order to conduct business with The Home Depot. These requirements are part of all commercial agreements with The Home Depot.

### **Laws and Regulations**

Suppliers must operate in full compliance with all applicable laws and regulations of the countries in which they operate.

### **Child Labor**

Suppliers must not employ workers younger than the greater of 15 years of age -- or 14 where the local law allows such exception consistent with International Labor Organization guidelines -- or the age for completing compulsory education or the minimum age established by law in the country of manufacture.

In addition, Suppliers must comply with all local legal requirements for the work of authorized young workers, particularly those pertaining to hours of work, wages, and working conditions.

### **Forced Labor**

Suppliers must not use forced, bonded (including debt bondage) or indentured labor, or prison labor, nor shall suppliers participate in slavery or trafficking of persons. This includes transporting, harboring, recruiting, transferring or receiving persons by means of threat, force, coercion, abduction or fraud for labor or services.

There shall be no unreasonable restrictions on workers' freedom of movement in the facility in addition to unreasonable restrictions on entering or exiting company provided facilities.

As part of the hiring process, workers must be provided with all documents relevant to their employment in a language they understand with a description of terms and conditions of employment prior to the worker departing from his or her country of origin, and there shall be no substitution or change(s) allowed in such documentation upon arrival in the receiving country unless these changes are made to meet local law and provide equal or better terms.

All work must be voluntary and workers shall be free to terminate their employment. Employers and agents may not hold or otherwise destroy, conceal, confiscate or deny access by employees to their identity or immigration documents, such as government-issued identification, passports or work permits, unless such holdings are required by law.

Foreign migrant factory workers should not be required to pay employers' or agents' recruitment fees or other related fees for the purpose of being hired or as a condition of employment.

### **Harassment and Abuse**

Suppliers must treat all workers with respect and dignity. No worker shall be subject to corporal punishment, or physical, sexual, psychological or verbal harassment or abuse. In addition, Suppliers will not use monetary fines as a disciplinary practice.

### **Compensation**

Suppliers must meet or exceed the minimum wage and compensation requirements as defined under applicable labor laws, applicable agreements and local regulations for regular work, overtime work, production rates and other elements of compensation and employee benefits.

### **Hours of Work**

Suppliers must ensure that, except in extraordinary business circumstances, on a regularly scheduled basis, workers shall not be required to work more than the lesser of (a) sixty (60) hours per week, including overtime or (b) the limits on regular and overtime hours allowed by the law of the country of manufacture. In addition, except in extraordinary business circumstances, all workers shall be entitled to at least one day off in every consecutive seven day period.

### **Non Discrimination**

Suppliers will ensure employment – including hiring, salary, benefits, advancement, discipline, termination, retirement, or any other terms and conditions of employment – should be based solely on the person's ability to perform the job requirements and not the person's beliefs or any other personal characteristics.

### **Freedom of Association and Collective Bargaining**

Suppliers must recognize and respect the rights of workers to exercise lawful rights of free association, including joining or not joining any association. Suppliers must also respect the legal right of workers to bargain collectively.

### **Health and Safety**

Suppliers must provide a safe and healthy working environment in accordance with applicable laws and regulations.

**Environment**

Suppliers must comply with all local environmental laws and regulations applicable to the workplace. Factories must conduct business in a manner which minimizes their impact on the environment.

**Subcontracting**

Suppliers must not use subcontractors in the manufacture of products or product components for The Home Depot without disclosing such information to The Home Depot, and only after the subcontractor has adequately demonstrated compliance with these Responsible Sourcing Standards.

**Communication**

Suppliers must communicate the provisions of The Home Depot Responsible Sourcing Standards to all workers and supervisors.

**Business Ethics**

Suppliers will conduct business with The Home Depot consistent with honesty and integrity and demonstrate the highest standards of business ethics. Suppliers will take no actions directed at improperly impacting the results of any audit including presentation of falsified records or coaching of employees. Consistent with The Home Depot Gift and Entertainment policy, Suppliers will not offer any incentives to The Home Depot's associates or audit firm representatives.

**Monitoring and Compliance**

The Home Depot will undertake affirmative measures, such as announced and unannounced on-site audits of production factories, to monitor compliance with these Responsible Sourcing Standards. Suppliers must maintain on site all documentation necessary to demonstrate compliance with the Responsible Sourcing Standards, and Suppliers must allow Associates and/or representatives from The Home Depot full access to production facilities, worker records, production records and workers for confidential interviews in connection with monitoring visits.

Suppliers are expected to take necessary corrective actions to promptly remediate any noncompliance. Suppliers are expected to actively engage in remediation – including timely preparation and presentation of a Corrective Action Preventative Action (CAPA) plan. The Home Depot reserves the right to terminate its business relationship with any Supplier who is unwilling to comply with these Responsible Sourcing Standards.

---

## THD RS STANDARDS - DEFINITIONS OF KEY TERMS

---

The standards embodied in The Home Depot Responsible Sourcing Standards are generally objective, measurable and linked to applicable local laws. However, in certain provisions of the standards, there are terms which could require clarification. The definitions of key terms included in the standards are intended to provide clarity to Suppliers with respect to the requirements outlined in the Responsible Sourcing Standards. The provisions and the related terms being defined are presented below.

### **Hours of Work – *Extraordinary Business Circumstances***

Extraordinary Business Circumstances – which allow for working hours in excess of 60 hours per week or working seven consecutive days – are limited to the following instances:

- Natural disasters, including but not limited to earthquakes, hurricanes and fires, directly affecting a supplier.
- Unforeseeable disruption in production resulting from a natural disaster at a supplier – e.g., a hurricane disrupts the production at a textile facility, which has a direct impact on a sewing facility's operation.
- Unforeseeable business events, including but not limited to peak season machine malfunction, at a facility.

It is important to recognize that the exceptions provided under *Extraordinary Business Circumstances* do **not** provide a basis for exceeding the limitations on hours of work or consecutive days worked in accordance with local laws.

### **Hours of Work – *Regularly Scheduled Basis***

Regularly Scheduled Basis – which allows for working hours in excess of 60 hours per week – is limited to the following instances:

- Hours of work in excess of the limits prescribed in the Responsible Sourcing Standards will be considered regularly scheduled to the extent that the hours worked in a given week exceed 60 hours more than 25% of time as measured in any 12 week period.

For example, in any 12 week period, to the extent hours or work exceed the requirements of the “Standards” in more than 3 weeks, these events would be considered regularly scheduled and in violation of the requirements of the “Standards”.

It is important to recognize that the exception provided under *Regularly Scheduled Basis* does **not** provide a basis for exceeding the limitations on hours of work or consecutive days worked in accordance with local laws.

**Health and Safety** – *a clean, safe and healthy work environment in compliance with all applicable laws and regulations*

Clean, safe and healthy work environment includes all requirements of the applicable local law – e.g., Occupational Safety and Health Administration (OSHA) for factories in the United States or European Union/European Economic Community (EU/EEC) Directives for factories in Europe. The principle areas of focus in this regard will initially comprise:

- Fire Safety
  - ✓ Fire Extinguishers
  - ✓ Fire Exits
  - ✓ Evacuation Plans
  - ✓ Fire Drills
- Machine Guards
- Personal Protective Equipment
- Lighting, Temperature and Ventilation
- Toilet Facilities

**Nondiscrimination** – *beliefs or any other personal characteristics*

Beliefs and other personal characteristics include, but are not limited to, the following:

- Race
- Religion
- Age
- Gender
- Ethnic Origin
- Caste
- Political Opinion
- Disability
- Sexual Orientation

**Subcontracting** – *subcontractors in the manufacture of products or product components for The Home Depot*

Factories, other than the facility identified for the production of a product for The Home Depot, involved in either the final assembly of the product or the manufacture of product components with the logos of any of The Home Depot's brands.

**Communication** – *communicate the provisions of The Home Depot Responsible Sourcing Standards to all workers and supervisors*

Necessary steps to ensure the terms of the Responsible Sourcing Standards are presented to employees in languages understood by all employees. This can be accomplished through meetings and presentations on the requirements – including posting – of other codes of conduct with similar provisions.

---

## TERMINATION GUIDELINES

---

The Home Depot (THD) is committed to working with suppliers and factories to address non-compliance with The Home Depot Responsible Sourcing Standards (the Standards). THD's relationship with suppliers and factories that are unable or unwilling to address identified compliance issues may be terminated consistent with these Termination Guidelines.

The Home Depot's VP of Sustainability/RS and Director of RS have joint authority to determine the appropriate sanctions for a factory or supplier. At the discretion of the VP of Sustainability/RS, the Emerging Issues Council (EIC) (which is comprised of senior executives from various departments throughout THD) may be requested to determine the appropriate sanctions for any critical or repeated violations at a specific factory or supplier.

### **Termination for Critical Findings**

Factories with Critical Findings may be subject to immediate termination at the discretion of the EIC. If a factory is given the opportunity to remedy the Critical Failure, they must do so within 30 days. Factories that fail to correct these Critical-rated findings by the follow-up audit in 30 days will be subject to termination.

Examples of Critical-rated findings leading to termination include:

- Use of workers under the legal age of employment
- Any type of prison, bonded, indentured or other forced labor
- Physical punishment or abuse
- Life-threatening health & safety issues (e.g. locked emergency exits, immediate fire hazards)
- Falsification of records
- Attempted bribery of auditors
- Other issues or conditions determined to be Critical by THD
- Unauthorized subcontracting

### **Termination for Non-Critical Findings**

Factories that fail to correct other, Non-Critical-rated High and Medium Risk findings after 2 Follow-up Audits will be moved to "Non-compliance" status and no new purchase orders will be given to the factory. If the factory remains in the "non-compliance" status for 60 days they will be automatically terminated. Examples of Non-Critical-rated High and Medium Risk findings leading to termination after the 2<sup>nd</sup> Follow-up Audit include:

- Minimum wage violations
- Overtime wage violations
- Systematic excessive overtime (over 72 hours per week) on a regular basis
- Monetary fines
- Other issues or conditions determined to be High Risk by THD

### Termination of Suppliers

Suppliers that have a second factory terminated based on the above guidelines may be subject to termination of the overall business relationship between the Supplier and THD.

### Reinstatement after Termination

Reinstate a terminated factory

A terminated factory may be eligible for reinstatement if they meet the following criteria:

- Must wait one (1) year from termination date before requesting reinstatement.
- Factory must demonstrate they have implemented a management system which addresses all of the Standards. The systems will be audited by THD's RSTeam or THD's designated representatives.
- Achieve a grade of "B" or better from a social compliance audit firm that is scheduled by THD as part of the reactivation process
- If a factory does not achieve a "B" score or better, they may reapply for re-instatement after improving their compliance with THD RS standards. The factory must also wait a minimum of 3 months for grade a "C" and 6 months for a grade "F" from notice by THD of their failure to meet the reinstatement standards.

Reinstate a terminated supplier

A terminated supplier may be eligible for reinstatement if they meet the following criteria:

- Must wait one (1) year from termination date before requesting reinstatement.
- Supplier must demonstrate they have implemented a management system which addresses all of the Standards. Engaging the services of a qualified social compliance firm to assist in developing a management system is preferred.
- The management system must be able to pass an assessment by THD's RS team or THD's designated representatives.

**Note: These Termination Guidelines are intended to provide guidance on how to react to violations of The Home Depot Responsible Sourcing Standards. The lists of Critical and High Risk issues above are not all-inclusive and THD's decisions will vary based on THD's assessment of the associated risk to their reputation and willingness to work with and remediate existing suppliers. Depending on the circumstances and prevalence of the violations, THD may consider alternative actions.**

---

## RESPONSIBLE SOURCING AUDIT READINESS GUIDE FOR NEW FACTORY

---

The purpose of this document is to provide the suppliers a better understanding of readiness for The Home Depot's Responsible Sourcing (RS) audit, ensure the new factories' management system and whole manufacturing process will be evaluated and potential risk will be detected. Later in the RS audit process, suppliers are required to have their factories' RS management system reviewed and provide evidence to prove they are in compliance with THD RS Standards. This preliminary screening will help to identify any issues related to the supplier's readiness for the RS audit before that point.

Before an onboarding kick off, suppliers need to make sure all of the below points are completed, and provide related evidence to the RS team for review:

1. All construction of buildings in the new factory are complete.

Evidence required:

- Factory layout
- Building picture
- Factory construction completion certificate (if required by local government)

2. Equipment and facilities for every production process are ready.

Evidence required:

- Manufacturing process map
- Equipment/facility picture for each process

3. Necessary workforce (production workers) are in place.

Evidence required:

- Factory workforce needs and recruiting plan
- Factory personnel list

4. All production processes have been in operation for at least 2 months.

Evidence required:

- Working time record of all production processes for one full month
- Payroll of all employees for one full month

5. Disclose any sub-tier factories that will be involved in production of components with THD private brand logo in the FlexPLM system

Evidence required:

- Screenshot of the info filled in Flex (if the sub-tier is in scope of RS definition)

Note:

1. If the new factory has not received their official business license (even though production has already started with payroll and working time records), the Supplier/factory needs to provide related in-progress evidence and confirm the factory address is consistent with the one they used when applying for the audit.

2. If the factory expands a building or facility after the RS audit is completed, an additional partial audit may be required and the RS team will make a final decision on that.

---

## FACTORY AUDIT EXPECTATIONS

---

All factories that produce goods for The Home Depot are subject to on-site audits to assess compliance with The Home Depot Responsible Sourcing Standards (Exhibit 1). Audits can be announced or unannounced.

### Pre-Visit

If the audit is announced, The Home Depot or an authorized audit firm will contact the factory manager to schedule the audit. In anticipation of the audit, the factory manager is required to complete a Factory Profile Questionnaire (Appendix B) and review the Document Request List (Appendix C).

### Audit Execution

Depending on the location and size of the factory, management can generally expect either two auditors to spend one day or one auditor to spend two days at the factory assessing compliance with The Home Depot Responsible Sourcing Standards. During the audit, the auditors will do the following:

- Conduct an opening meeting with management
- Review payroll records
- Review employee time cards
- Review personnel files
- Review production records
- Conduct private employee interviews
- Walk through the facility and dormitories, if applicable, conducting visual inspections
- Conduct a closing meeting with management summarizing any findings

### Audit Postponement and Cancellation

If factory apply for audit postponement with valid reasons listed below, it need to be approved by the directors of RS, QA and global risk. If the reasons factory provided are invalid, the audit need to be conducted on scheduled audit date.

List of valid excuses when accompanied with evidence:

- Events forcing closure out of the control of the factory or SP: fire, natural disaster, power outage, flooding
- SP resources (Issue will be reviewed with SP under contract)
- Holiday
- Previous audits already scheduled and confirmed with the SP conducting the previously scheduled audit
- No Production: to include low season with no production line running, majority of factory staff on leave, majority of machine on maintenance
- Construction or renovation occurring at factory affecting the majority

List of invalid reasons for audit delays:

- Need more time to prepare for audit
- Responsible person of the factory is out of the country, or on vacation
- Factory is too busy

Audit cancellation and postponement within 2 to 5 business days of the agreed audit date will be charged a fee of 50% of the audit fee, including any non-refundable travel expenses. Audit cancellations and postponements within 2 business days of the agreed audit date will be charged 100% of the audit fee including any non-refundable traveling expenses incurred. The supplier will be responsible for paying for supplier initiated cancellations & postponement.

### Debit Program

The service providers assigned by THD are expected to schedule and complete all audits within 14 days from the date of receiving the audit notification. If the factory requests a date change more than 14 days, the SP will report to THD. If the request was not approved by THD, SP will execute the audit on original schedule and debit program will be launched. If payment is not received by the day of the audit, the audit will be conducted. SP will invoice THD for the cost of the audit on the first day of the following month. Payment will be required from the supplier prior to THD releasing POs. If the factory denies entry to the auditor and the auditor leaves, this will be considered a critical deficiency.

Supplier is responsible for paying the Access Denied charge which will be 100% of the audit fee including any traveling expenses incurred.

### 24-Hour Alert Notification

If a significant compliance issue is identified during the execution of the audit, an Alert Notification Form will be issued to The Home Depot via email within 24 hours of the audit date. The Alert Notification will be issued for the following significant compliance issues:

- Child Labor
- Forced Labor
- Workers Subjected to Physical Abuse
- Workers Subjected to Sexual Abuse
- Workers Subjected to Coercion and Harassment
- Life Threatening Health & Safety Issues
- Attempts to bribe auditors
- Denial of Access
- Unauthorized subcontracting

### Audit Results

Based on the findings identified during the audit, the Factory will receive one of the following overall ratings based on the most significant findings identified during the audit.

- Grade "A":** A Grade "A" overall rating indicates there were (i) only minor or no compliance issues identified in the execution of the audit resulting in a score between 95-100; or (ii) through the performance of follow-up audits, all identified compliance issues have been addressed.
- Grade "B":** A Grade "B" overall rating is assigned when there are isolated deviations for issues considered Non-Critical as defined in Exhibit 3 which result in an audit score between 80-95.
- Grade "C":** A Grade "C" overall rating is assigned when there are deviations for issues considered to be Non-Critical as defined in Exhibit 3 which result in an audit score between 65-80.
- Grade "F":** A Grade "F" rating is assigned when (i) there are deviations for issues considered to be Non-Critical as defined in Exhibit 3 which result in an audit score below 65; or (ii) there are deviations for issues considered to be Critical as defined in Exhibit 3.

---

## FACTORY COMPLIANCE GUIDELINES

---

In order to support factories' efforts to ensure compliance with The Home Depot Responsible Sourcing Standards and provide information to support effective preparation for audits, the following compliance guidelines are provided. While the listing included below is not considered all encompassing, the guidelines presented provide an effective framework for factories in the development of policies, procedures, practices and records to accomplish and effectively demonstrate compliance with the Standards.

### I. Policies, Procedures, and Record Retention

- ✓ The factory must maintain written policies and procedures that ensure adherence to the Standards
- ✓ The factory must maintain current copies of all applicable laws and regulations related to the Standards
- ✓ The factory should have a mechanism to obtain updated information related to all applicable laws and regulations related to the Standards
- ✓ The factory must maintain personnel files for all current and former employees. Records for former employees should be retained for a period consistent with payroll record retention – see below. Personnel files for each employee should include the following:
  1. Proof of age
  2. Proof of citizenship or work permit (where necessary by law)
  3. Medical records (where necessary by law)
  4. Executed employment contract (where necessary by law)
  5. Termination letter (where necessary by law)
  6. Record of disciplinary actions
  7. Authorization for all voluntary deductions
- ✓ The factory should have a set of rules and regulations certified by the department of labor (where applicable)
- ✓ The factory should communicate rules, regulations including disciplinary procedures and practices to employees (e.g. bulletin boards)
- ✓ The terms of any probationary period should be outlined in the employee's employment contract and personnel file
- ✓ All necessary documentation to assess compliance with the Standards must be maintained onsite at the factory including payroll, time, and piece rate records for at least a 1 year period

**II. Child Labor**

- ✓ No person under the local minimum working age may work in the factory
- ✓ No person under the mandatory school age may work in the factory
- ✓ Documentation must be required to prove age when hiring workers
- ✓ All age documentation should be maintained on file in the factory
- ✓ Employees hired as part of an apprenticeship program may not be under 14 years old or the legal minimum age
- ✓ Minor age employees should not be allowed to work in hazardous job positions
- ✓ If required by national or local law, minor age employees should work restricted hours
- ✓ Children should not be present in the factory, unless in a nursery located away from the production areas

**III. Labor Policy**

- ✓ All employees in the factory must be voluntarily employed
- ✓ No prison workers should be working at the factory
- ✓ Employees freedom of movement must not be unnecessarily restricted
- ✓ Original copies of employee's government issued identification or travel documents should not be held by the factory
- ✓ Employees should not incur disciplinary deductions
- ✓ Supervisors should not use corporal punishment or other abusive practices
- ✓ All employment decisions must be based on ability
- ✓ Pregnancy testing must not be conducted as a condition of initial or continued employment
- ✓ Contraceptives may be made available to employees, but the employees should never be required to use them

**IV. Wages and Benefits**

- ✓ Suppliers must meet or exceed the minimum wage and compensation requirements as defined under applicable labor laws, applicable agreements and local regulations for regular work, overtime work, production rates and other elements of compensation and employee benefits.
- ✓ Piece rate workers must be guaranteed at least the minimum wage specified by national and local laws, not including attendance, production or other bonuses.
- ✓ Employees must be fully compensated for all overtime hours in accordance with statutory requirements
- ✓ Employees must be paid in a regular and timely manner
- ✓ Earned wages must not be withheld for any reasons
- ✓ The factory should have procedures in place for employees to question wages paid and possible adjustment to their pay

- ✓ The factory must maintain – and present to monitors – a true and accurate record of hours and wages. Records should, at a minimum, include:
  - a. Payroll Register
    - 1. Normal rate compensation
    - 2. Overtime rate compensation
    - 3. Wage computation for entitled benefits – e.g. holiday pay; annual leave; sick leave
    - 4. Deductions
    - 5. Employee acknowledgement of wage receipt
  - b. Time Records
    - 1. Automated – punch card to swipe
    - 2. Employee involved – e.g. employees punch their own cards
    - 3. All time in/time out – including meal breaks – reflected
  - c. Piece Rate Records – if applicable
    - 1. Acknowledged by employees
  - d. Paystub – in employees’ native language
    - 1. Normal Work Hours
    - 2. Overtime Hours
    - 3. Gross Wages
    - 4. Net Wages
    - 5. Bonuses
    - 6. Allowances
    - 7. Authorized Deductions
- ✓ The factory must provide paid holidays and vacation as required by law
- ✓ The factory should provide all benefits required by national and local laws
- ✓ The factory should have documentation to support employees’ consent to make voluntary deductions from their pay

**V. Working Hours**

- ✓ The scheduled work hours should be posted
- ✓ The number of regular hours in a week is determined by national and local laws
- ✓ The scheduled overtime hours should be posted
- ✓ Overtime hours must not exceed the hours specified by national and local laws
- ✓ Employees must have the right to refuse overtime
- ✓ Employees must have at least one day off each week (7 days)
- ✓ Work hours must be properly recorded, listing in and out times for every day worked including meal breaks
- ✓ Work hours should be recorded by employees themselves utilizing an automated time keeping system – e.g. punch or swipe card

**VI. Work Environment**

- ✓ Harassment in any form should not be permitted
- ✓ Physical, verbal or mental abuse should not be permitted
- ✓ Factory should provide training on health and safety
- ✓ If required by national or local law, medical care should be available on-site
- ✓ A first-aid kit with proper medical supplies should be available to employees
- ✓ Employees should be provided all necessary safety equipment (masks, metal mesh gloves for cutters) free of charge
- ✓ Records should be kept of injuries or accidents
- ✓ Employees must have unrestricted access to restrooms during the workday
- ✓ The number of restrooms must be appropriate for the number of employees
- ✓ The restrooms must be sanitary and stocked with necessary supplies
- ✓ A source of drinking water must be available to employees
- ✓ Rest breaks should be provided to employees as required by law
- ✓ If the factory has a cafeteria, it must be sanitary and food must be stored properly
- ✓ There must be adequate lighting and proper ventilation in the factory
- ✓ The aisles must be marked and free from obstruction
- ✓ All electrical wiring must be safe
- ✓ All electrical control panels should be marked
- ✓ All machines should have machine guards, where necessary
- ✓ There should be an adequate number of fire extinguishers located around the factory
- ✓ The fire extinguishers should be mounted on the walls at the proper height
- ✓ Employees should be sufficiently trained to use the fire extinguishers
- ✓ The fire extinguishers must be properly charged and routinely checked
- ✓ The fire exits should be adequately marked
- ✓ The fire exits should never be locked and access to fire exits should never be blocked in any way
- ✓ Evacuation plans should be posted throughout the factory
- ✓ Evacuation drills should be conducted in the factory regularly, but not less than twice per year
- ✓ An inventory of hazardous chemicals must be maintained
- ✓ MSDS in the local language must be maintained for all chemicals used in the factory
- ✓ All hazardous chemicals must have secondary containment
- ✓ Any dormitories provided for employees are subject to all health and safety requirements

**VII. Environmental**

- ✓ The factory must maintain copies of mandatory permits and certificates necessary to demonstrate compliance with applicable environmental regulations
- ✓ All waste (liquid, solid, airborne) must be disposed of properly

**IIX. Other**

- ✓ No unauthorized outside contract factories can be used for production for The Home Depot
- ✓ No outside contract production – such as assembly – in people’s homes (homework) can be used for production for The Home Depot

**The factory must follow all other applicable national and local laws.**

**Applicable policies and requirements include, but are not limited to, those listed above.**

---

## PACKAGING AND PRINTING CLARIFICATION DOCUMENT

---

### Unauthorized Subcontracting

Clarification on what is meant by:

**“Packaging and Printing facilities are not in scope”**

Categories Covered in this guidance document:

#### **Packaging**

Product container

- Carton
- Other packaging

#### **Labels:**

- Non-printed Label
- Printed Label

#### **Product and component**

- Product/component
- Accessories

#### **Others**

- Outsourced process
- Mold and film

**For the purposes of this guidance document:**

- **An “X” in the “No” box means it is not considered a subcontracted item per our policy at this time.**
- **If there is an “X” in the “Yes” box, it is not considered to be an exempt packaging or printing and if the item is produced by a sub-tier facility it is considered a subcontractor and would require the vendor to onboard the factory in FlexPLM system and receive a Responsible Sourcing audit.**

**Definition of Subcontracting: ““Subcontractors are third party factories used by THD suppliers to manufacture THD-branded components or conduct final assembly of THD-branded finished goods.”**

**Packaging materials**

**1) Product Containers**

Containers with Private Brand (PB) Logo printed directly on container necessary to hold product (i.e. not paper or plastic stick on labels)    No  Yes

Woven bag printed with PB logo  
No  Yes

PVC container with PB logo  
No  Yes

Plastic box for power cables with PB logo  
No  Yes

Above container manufacturers marked as “Yes” are considered a THD subcontractor in the following circumstances:

- Factory 1 produces and prints PB logo on it. No  Yes
- Factory 1 produces container without PB logo. No  Yes
- Factory 2 prints PB logo on reusable container. No  Yes
- Factory 2 prints PB logo on disposable container not necessary to hold product. No  Yes

2) Carton

	
<p>Mater Cartons printed with PB logo          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>	<p>Mater Color Cartons printed with PB logo          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>
	
<p>Master Cartons with Department Number and PO/Country of Origin Info          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>	<p>Quarter Pallet with PB logo          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>

3) Other packaging

	
<p>Disposable Blister card printed with PB logo          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>	<p>Plastic/non-woven fabric/paper disposable bag printed with PB logo          No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>

		<p>Woven/non-woven fabric/plastic reusable product storage bag printed with PB logo          No <input type="checkbox"/> Yes <input checked="" type="checkbox"/></p>
---	---	--

Above other packaging manufacturers marked as “Yes” are considered a THD subcontractor in the following circumstances:

- Factory 1 produces reusable packaging and prints PB logo on it. No  Yes
- Factory 1 produces packing materials without PB logo. No  Yes
- Factory 2 prints PB logo on reusable packing materials. No  Yes

**Labels**

**1) Non-printed labels**

		
<p>Label with woven/embroidered logo</p>		

For non-printed label, pls. see below clarification,

- Factory manufactures blank label without THD logo. No  Yes
- Factory manufactures\* THD logo together with the fabric base, and then cuts the fabric into labels. No  Yes
- Factory purchases blank fabric in, then manufactures\* THD logo on the fabric and cuts the fabric into labels. No  Yes

Manufacture\*: Processes include weaving, embroidering, Etc. (Not printing).

2) Printed label

For printed label (no matter with fabric or non-fabric base), pls. see below clarification,

- Factory manufactures the fabric/paper base, then prints\*\* THD logo on it and cut into labels. No  Yes
- Factory purchases the fabric/ paper base in, then prints\*\* THD logo on blank fabric/paper base and cut them into labels. No  Yes

Print\*\*: Silk-screen printing, laser printing, inkjet, Etc.

- Printed Stickers on THD products: No  Yes

- Printed Tags hanging/attached to THD products: No  Yes

• Printed Stickers or color cards on containers: No  Yes

**Products & Components**

**1) Product or component with PB logo**

Outsourced products/components with THD logo      No  Yes

**2) Accessories**

Accessories with Private Brand logo attached to THD products: keys, zippers, tape, button etc.  
 No  Yes

Above accessory manufacturers marked as "Yes" are considered a THD subcontractor in the following circumstances:

- Factory 1 produces accessories and forms (i.e. prints, stamps, injections) PB logo on it. No  Yes
- Factory 1 produces accessory without PB logo. No  Yes
- Factory 2 forms (i.e. prints, stamps, injections) PB logo on accessory and sends to final assembly factory. No  Yes

Fixed Private Brand logos: metal plate, rubber label, PVC label etc. No  Yes

**Others**

**1) Outsourced Process**

Production process outsourced with THD logo No  Yes

Outsourced process of die casting involving Private Brand Logo No  Yes

Outsourced process of powder coating involving Private Brand Logo No  Yes

	
<p>Semi-product with Private Brand logo in primary factory before sending out for plating</p>	<p>Outsourced process of plating for semi-product with Private Brand logo No <input type="checkbox"/> Yes <input checked="" type="checkbox"/></p>

2) Mould and film

	
<p>Mould with THD logo: No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>	<p>Film of silk printing: No <input checked="" type="checkbox"/> Yes <input type="checkbox"/></p>

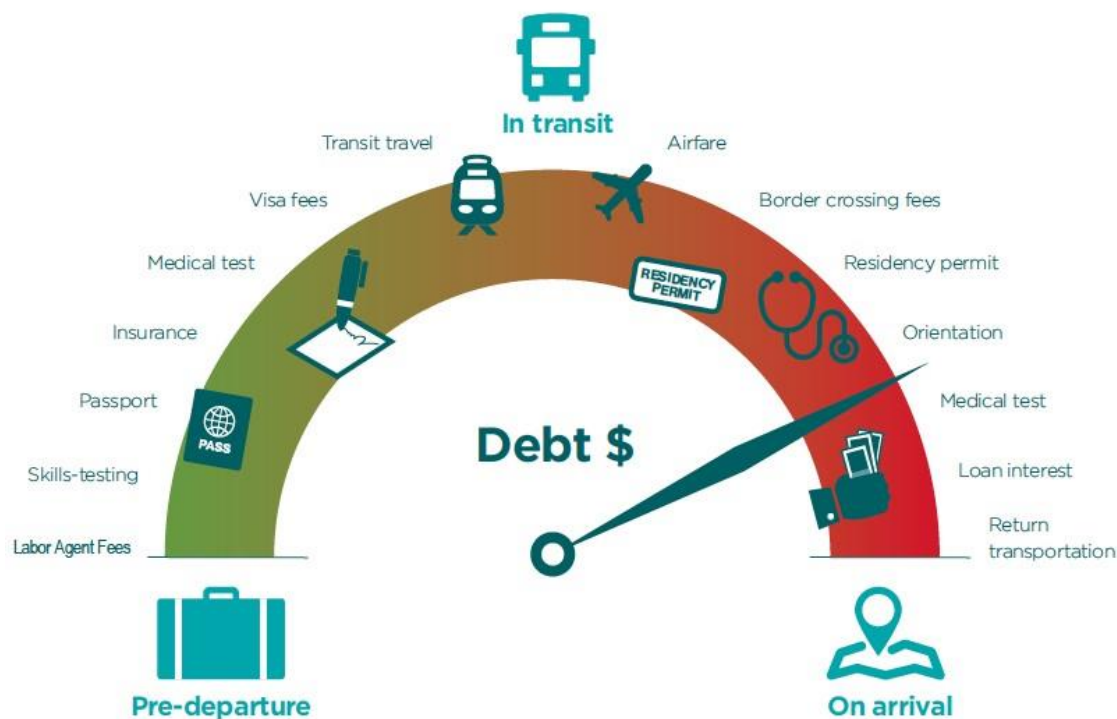

## FORCED LABOR POLICY IMPLEMENTATION Q&A

### Q1: What findings will lead to implementation of the penalty?

**A:** Any non-compliance of THD Forced Labor policy. Factory withholding foreign migrant worker's passports, factory restriction of worker's free movement on factory premise, and factory or labor agency recruitment fees paid by workers are all examples of non-compliance with the THD Forced Labor policy.

### Q2: What fees will be counted as a recruitment fee?

**A:** The recruitment fee includes all fees that the worker pays to the factory or labor agency in both the origin and receiving country for the purpose of being hired or as a condition of employment. These include but are not limited to the following:

### Q3: If a factory or labor agency charges fees to workers that are in compliance with local law, will it lead to the penalty?

**A:** Yes. The Home Depot Forced Labor Policy takes precedence in these cases over local law.

**Q4: For ongoing agency service fees which are paid by existing foreign migrant workers, will it be counted as a recruitment fee and lead to a penalty?**

**Example:** A factory in Taiwan has over 50 existing FMW's which are still paying a USD60/person service fee to the labor agency on a monthly basis. The new policy went into effect on 10/19/2020.

**A:** For any fees that are in place prior to the 10/19/2020

1. Where workers are paying the recruitment agent directly, factory/vendor must reimburse the workers for these fees either in a lump sum to cover the remaining fees owed per their contract, or on a monthly basis for the remainder of the contract so they are no longer personally responsible for covering the cost of such fees.
2. Where the factory/vendor has contracted directly with the recruiting agent and the factory/vendor is deducting these fees from a worker's monthly salary, this practice will be stopped immediately and the FMW will no longer be responsible for these fees for the remainder of their contract.

Any FMW hired after 10/19/20 should not pay any recruiting fees. If fees are discovered upon the workers arrival to the factory, these fees should be reimbursed immediately (no later than 90 days from hire date).

If a FMW is found to be paying any recruiting fees after 10/19/2020 and does not meet the above guidance, it will be considered a finding and will lead to a penalty .

**Q5: If the labor agency was directly responsible for any violations of the THD forced labor policy, will the related supplier be responsible for that and fined the penalty?**

**A:** Yes, the supplier/factory have the responsibility to select qualified agencies and ensure their processes and partnership are in compliance with THD Forced Labor policy.

**Q6: Are there any recommendations for factories to continuously implement THD requirements on recruitment fees for foreign migrant workers?**

**A:** We suggest that each factory set up strong procedures and policies on foreign migrant worker recruitment. The factory should sign contracts with labor agencies that clearly state the factory will be responsible for all fees during the process in both the origin and receiving

countries. Suppliers and factories need to ensure they have systemic management of their program to continuously implement the policy.

**Q7: What are some examples of “unreasonable restriction on workers’ free movement in a factory”?**

**A:**

**Scenario 1:** The factory has a written policy which restricts employees temporary or urgent leave (e.g. Workers are not allowed to leave during work hours under reasonable circumstances (ex: for personal or health emergencies and Potable water is not available to all employees during production time). The implementation of the policy is confirmed by employees during the interview process.

**Scenario 2:** The factory has a written policy which restricts employees temporary or urgent leave (ex: for personal or health emergencies and Potable water is not available to all employees during production time). According to employee interviews, workers can go to the toilets, take urgent leave, or get drinking water without approval and without any punishment/penalty from factory. In these cases, it will not be considered as forced labor. No penalty will be imposed, however, the factory needs to revise the written policy during the CAPA process.

**Scenario 3:** The factory has a written policy which restricts employees temporary or urgent leave (ex: for personal or health emergencies and Potable water is not available to all employees during production time). According to management/employee interviews, there is a reasonable backup plan/system in place, such as backup person for random employees to go to the toilets, regular shift rest after certain period, and an emergency production line shut down system which allows employees to get such temporary or urgent leave when necessary. In these cases, it will not be considered as forced labor. No penalty will be imposed, however, the factory needs to revise the written policy during the CAPA process.

**Scenario 4:** The factory does not have a written leave policy. During employee interviews and onsite observation (locked toilets, door card system), employees could not get temporary or urgent leave when necessary. The factory should develop a leave policy which does not restrict the workers temporary or urgent leave.

**Q8: If a Factory closes and locks their entry/exit gate during working hours due to a lack of security guards (e.g. some security guards are on leave). Will that be considered as forced labor?**

**A:** Yes. Any main gate or room gate must not be locked during working hours while the workers are inside the enterprise. Not only is the freedom of movement restricted, but this is also a safety concern for employees in case of emergency such as fire/explosion or other health and safety related issue.

**Q9: The Factory locks the dormitory during the night to protect employees' safety or prevent them from stealing factory property. Will that be considered as forced labor?**

**A:** Yes. Workers should not be locked in any area of the facility. In addition, it also violates occupational health and safety principles. Although the factory has the right to protect its own property, it should take other appropriate methods.

**Q10: A Factory withholds part of an allowance/payment to workers in case there are tools/equipment/uniform damage or loss by the employee. If the employee does not damage or lose any tools/equipment during the period and/or returns the uniform when they resign, the factory will release the allowance. Is this considered Forced Labor?**

**A:** According to THD policy, withholding of wages or allowances (including required deposits), constitutes a restriction on workers' freedom of movement under the Forced Labor provision. The better way is to inform workers once hired that they need to take care of the tools/equipment to prevent damage or loss, and they are required to return their uniform when they resign. If the tools/equipment are damaged or lost due to a worker's improper usage or carelessness, or the uniform is not returned, a reasonable amount will be deducted from their last month's payment.

**Q11: A Factory holds unpaid salary of workers who leave the factory without notice until worker comes back to complete the resignation process. Will that lead to penalty?**

**A:** If it is in compliance with local law it will not lead to a penalty.

**Q12: Some workers request the employer to keep their passport to prevent the passport from getting lost. In such situations, will it be counted as forced labor if the factory keeps the passports of foreign migrant workers per their request?**

**A:** Withholding passports or identification documents of migrant workers may result in a situation of forced labor. In a case like this, the factory needs to provide adequate facilities to ensure the safety of the workers documents. A best practice is to provide private lockers to workers where only the workers have the key or combination to open them.

**Q13: A foreign migrant worker signs a contract in their local language with an agency in their home country. Once they arrive to the factory, they are then provided additional documents in a language they understand that describes the terms and conditions of their employment which were not in the original signed contract with the labor agent. Is this forced labor?**

**A:** Yes. As part of the hiring process, workers must be provided with all documents relevant to their employment in a language they understand with a description of terms and conditions of employment prior to the worker departing from his or her country of origin, and there shall be no substitution or change(s) allowed in such documentation upon arrival in the receiving country unless these changes are made to meet local law and provide equal or better terms.

**Q14: How to distinguish overtime from forced labor?**

**A:** The requirement to work overtime is not considered forced labor as long as it is within the limits of local law or clearly stated in the collective agreement.

If there is any threat of punishment or deduction from workers' earned payment (including normal wage, production bonus, full-attendance bonus for normal working hours and other regular allowance) when they refuse to work overtime, it will be considered as forced labor and may lead to a penalty.

Another situation with potential risk is when an employees' wage is set/calculated by productivity goals only (piece rate worker). In these cases, the employees might have to work excessive overtime because this is the only way to gain the minimum wage. While the worker can refuse to work overtime, they actually they have no choice as they will not be paid for not meeting the goals. The employer should ensure there is a reasonable wage system and productivity goals in place.

---

## TRANSPARENCY AND IMPROVEMENT PROGRAM (TIP)

---

The Home Depot understands there are pressures in the supply chain which may cause a factory to take shortcuts with regards to social and environmental responsibilities. While these may be common practices, they are understandably not acceptable to The Home Depot. By working with factories that do not treat their workers or the environment in a legal manner, we risk compromising our core values of "Doing the Right Thing" and "Respect for All People" as well as the confidence of The Home Depot customers.

In order to address these problems, most retailers and brands have required suppliers and their respective factories to undergo periodic social, labor, and environmental responsibility (RS) compliance assessments. In response to any findings which do not meet the company's RS standards, factories are then expected to take corrective action to fix each problem within a relatively short period of time. Although this approach provides good results in some countries, it needs considerable improvement for others. In fact, the way in which most brand compliance programs are managed has led the majority of factories to falsify records, coach workers, and bribe auditors in hope of passing compliance audits. The result of this is further distrust and the weakening of business relationships.

### **A Better Path:**

The primary goal of The Home Depot, in partnership with selected suppliers, is to develop business relationships that provide for a sustainable supply of product while respecting the rights of workers. To accomplish this goal, The Home Depot has developed the **Transparency & Improvement Program (TIP)**. The TIP program is designed to reinforce the need for transparency and provide factories the opportunity and support needed to improve management systems in a practical way and within reasonable time frames. The TIP program is a mandatory requirement for factories that have failed a Responsible Sourcing assessments (RS) and would like to begin and/or continue supplying to The Home Depot. Only factories that are prepared to be transparent and willing to improve their business and labor practices will be considered for the TIP program. The Home Depot believes that your cooperation and participation in the TIP program will enhance our business relationship and also improve the operations of your factory. This is an opportunity and resource that The Home Depot is extending to selected suppliers and their factories. Sincere participation will be required in order to begin to receive and/or continue receiving production orders.

We encourage you to study the TIP program description provided in the following pages closely and to discuss any questions or concerns you might have with The Home Depot.

## TIP Program Cycle

## Communication (Recognizing Benefits)

The success of the TIP program is inherently bound to whether or not the supplier/factory: a) understands the program objectives and mechanics, b) recognizes the advantages of taking part, c) is willing to be transparent about their practices and challenges, and d) Share the responsibility for improvements. For these reasons, clear upfront communication is critical to success. In particular the below points must be clear:

- a. **Benefit:** participating in the TIP program allows for the following benefits:
  - Business Management Systems improvement
  - Increased profitability via productivity improvement and lower workers turnover
  - Continued Business Relationship with The Home Depot
  - Factory controls the improvement process
- b. **Termination:** an understanding that the vendor/factory will not be terminated by The Home Depot for RS compliance reasons while participating in the program in good faith and with full transparency.
- c. **Confidentiality:** an understanding that all information gathered by any third party firm & the brand will be kept in full confidence and not shared with any other companies unless pre-approved by the vendor/factory. The third party firms will not perform traditional compliance audits for other Companies/Brands while the vendor/factory is partaking in the program. The third party firms will also sign a confidentiality agreement with the vendor/factory

## TIP Baseline Visit

Typical Duration: 2 staff days (1 consultant conducting in two days)

The TIP program will begin with a Follow up Visit to verify progress of the deficiencies found in the original on-boarding assessment performed by THD Service Provider (SP). And ELEVATE will support factory to identify root cause and help factory to develop workable solutions and action plans as well.

The objective of this baseline Visit is the following:

1. Provide the ELEVATE consultant with hands on deeper understanding of the deficiency noted in the original on-boarding assessment.
2. Verify if provided documents/records related to work hours and wages are true and accurate to continue to determine the current overall compliance level of the factory with The Home Depot's expectations and local law.
3. To determine if the factory has a responsible official for RS as well as a sustainable RS operational system.
4. Provide technical guidance and support to the factory related to management systems and RS performance.
5. Discuss and finalize the resource input on TIP, finalize the project goals, milestones, action plan and delivery to establish management system and correct the major issues.

Note: the success of the Baseline Visit depends on the willingness of factory management to be transparent with their real practices. Without full transparency, verification cannot be executed. Previous RS on-boarding audit results will also be reviewed/ validated during this process

## CAPA Development

Objective: The objective of the CAPA is to set short and longer term improvement action goals that are both realistic, achievable and that will help to improve the factory's RS performance grade.

Guidelines for CAPA development:

The CAPA provides detailed explanations of what specific improvement will (or have already) be made by the factory, the time frame and also the projected costs (if applicable). It is the expectation of THD that the factory will identify a realistic CAPA closure date to which they will be held accountable. Understanding projected costs allows The Home Depot and the supplier/factory to determine what's realistic.

- a. The CAPA Plan must be provided to ELEVATE for review within 7 business days of the initial visit. ELEVATE will review and advise the factory if any changes are needed before ELEVATE uploads CAPA to THD system for review. Once the completed CAPA Plan is sent to THD, it will be approved or sent back for further revisions within 48 hours.

## Support Visits

Objective: Support capacity building

When: After the TIP Baseline Visit

Depending on the size of the factory and/or sophistication of existing management systems, support is usually needed to increase the factory's ability to meet the CAPA and WHIS targets. For this reason, the third party firm will provide dedicated support specialists to visit each factory engaged in the TIP program at least once after the initial visit is executed and prior to a Progress Assessment (see below). The purpose of the support visit will depend largely on the factory's needs as requested by the factory and/or specified in the Follow up Assessment report. Each visit will be carried out by dedicated TIP support staff not associated with the Progress Assessment phase of the program. A report will be generated for each support visit made.

Support specialists are trained, experienced, and prepared to help factories understand and implement management systems related to the following areas:

- Records keeping
- Productivity enhancement
- Payroll
- Employee screening & retention
- Worker incentive programs (piece rate systems, bonuses, etc.)
- Health & Safety management systems
- Disciplinary management systems

## E-Learning

ELEVATE will provide a total of 3 eLearning lessons in English or Chinese for every TIP factory, including How to Develop a Good Corrective Action Plan(CAP) AND 2 additional lessons based on the factory's key issues. Primary factory contacts are required to complete the 3 lessons (pass the quizzes) within 14 days of receipt. If deemed helpful to the factory, consultant will assign additional lessons once the 3 lessons have been completed.

## CORRECTIVE AND PREVENTIVE ACTION (CAPA) MANAGEMENT PROCESS AND TIMEFRAME

A Corrective and Prevention Action (CAPA) plan is required subsequent to RS audits if any deficiencies are noted. Suppliers & Factory's should work with the Service Provider (SP) who conducted the audit for CAPA management (including CAPA plan creation, evidence submission and on-site CAPA verification). The Home Depot implements 100% on-Site CAPA Verification Program. Once CAPA plan was approved, THD will conduct verification that the actions were implemented via three level, risk-based "Tiered CAPA" model as follow :

### 3 Tier System

- Critical–15 day The Home Depot RS Team Engagement
- High-30 day Service Provider (SP) Engagement
- Medium– 90 day SP Engagement

Suppliers need to provide accurate and complete evidence for each point under every finding at least 7 business days before the on-site verification and clearly and specifically named the file or picture of evidence to match the deficiency.

If factory did not close CAPAs within the agreed upon timelines, an extension audit will be required. Supplier and factory will be notified of a final 30 day extension to fix open issues. The audit firm will visit the factory 30 days from the date of notification to verify closure of the CAPA's. It is supplier's/factory's responsibility to ensure the factory implements a program to fix and manage all RS compliance requirements as well as cover the cost of the additional follow up visit.

If this subsequent visit results in failure to close the CAPA's, THD will consider the factory "Non-compliant" and may block all further POs to the factory until the THD RS team indicates the factory is in compliance.

Tier CAPA Management Process and time frame overview:

Who	Content and Responsibility	Platform	Expected Time Line
Factory/Supplier	Receive automatic notification email from THD system to commence the CAPA Management process.	THD System	
Factory/Supplier	Receive formal audit report and notification email from THD SP to communicate the audit results, CAPA Plan preparation, and remediation expectations.	Email RS Closing Meeting Summary (CAPA format)	<= 6 calendar days after audit date
Factory/Supplier	Upon receiving notification email from SP, complete the CAPA plan and return to THD SP within timeline.	Email	<= 7 calendar days
Factory/Supplier	Receive reminder email from THD SP for CAPA plan submission.	Email	Starting from the 4 <sup>th</sup> calendar day of CAPA notification to supplier/factory
Factory/Supplier	Receive rejection/redo email from THD SP if CAPA plan doesn't meet requirements.	Email	
Factory/Supplier	Revise any rejected CAPA plan and return to THD SP.	Email	<= 2 working day
Factory/Supplier	Receive CAPA plan approval notification email from THD SP to communicate the CAPA evidence submission and on-site Tiered CAPA verification visit timeframe.	Email	
Factory/Supplier	Submit CAPA improvement evidence to THD SP.	Email	<= 7 calendar days before scheduled on-site CAPA verification visit
Factory/Supplier	Receive reminder email from THD SP for CAPA evidence submission.	Email	
Factory/Supplier	Receive rejection/redo email from THD SP if CAPA evidence doesn't meet requirements.	Email	
Factory/Supplier	Upon receiving rejection/redo email, revise any rejected RS evidence with new corrective evidence and return to THD SP.	Email	<= 7 calendar days before scheduled on-site CAPA verification visit
Factory/Supplier	Maintain sustainable RS performance, and wait for THD RS on-site CAPA verification audit conducted by THD SP or THD RS team.		
Factory/Supplier	Take CAPA verification audit(30-day visit for High risk CAPAs and 90-day visit for Medium risk CAPAS)	On-site visit	Scheduled visit day
Factory/Supplier	Receive CAPA closure notification email from THD system once the CAPA is approved by THD RS team.	THD System

**Store Support Center**

November 1, 2018

Dear Business Partner:

The Home Depot's success depends on our business relationship with our suppliers and manufacturers of our products. Given the nature of your work for us, the foundation for our relationship with you must be our mutual commitment to the highest level of ethics and integrity in our dealings.

In keeping with our continued tradition of excellence and mandate for "doing the right thing," and to help guard against any misunderstanding about our very strong policy against any commercial bribery of The Home Depot associates or our agents, we would like to remind you of your obligations under our **Business Code of Conduct and Ethics ("BCCE")**, particularly the Gift and Entertainment policy, which is attached for your convenience. As you know, under your company's Supplier Buying Agreement (SBA) with The Home Depot, you have committed to compliance with all of The Home Depot's policies, including our ethics policies.

The Gifts and Entertainment policy states our zero tolerance for any sorts of gifts or entertainment as they could improperly serve as bribes: *the Company has a zero tolerance policy for receiving gifts and entertainment when there is any chance that the purpose is to: improperly influence the recipient; violate the Company's Policies; or violate the law.* Specifically, this means that The Home Depot associates or employees of agents for The Home Depot, such as service providers, and members of their families, are prohibited from accepting, directly or indirectly, gifts, entertainment, services, money, or any other consideration of any kind from a vendor. This Policy applies at all times and does not change during the traditional gift-giving season, as a result of cultural traditions or during the planning of a Company event. **In general, you should not attempt to provide any items, money or product to any associate or representative executing services on behalf of The Home Depot. Any such offers made by you will be reported immediately to the proper Home Depot representative. Should any representative of The Home Depot attempt to solicit money or seek a commercial bribe, it is your responsibility to communicate this incident immediately to a Home Depot associate or The Home Depot's Corporate Compliance Department. Any violation of this policy may be grounds for immediate termination of The Home Depot's contract with your company.**

If you have questions or comments about the policies, please contact the sourcing office leader, the relevant SSC department representative or our Corporate Compliance Department at 770-433-8211, ext. 14098, or via email at [corporatecompliance@homedepot.com](mailto:corporatecompliance@homedepot.com).

The Home Depot  
Supplier Gifts and Entertainment Letter

---

The Home Depot provides a Supplier Alert Line for the exclusive use of our Vendors, Merchants and Home Depot representatives reporting violations of company policy pertaining to **receiving or soliciting gifts, bribes, kickbacks, disclosure of confidential information or a conflict of interest.** This resource is available 24 hours a day, 365 days a year.

If you are uncomfortable taking the issue to The Home Depot leadership team or if you wish to remain anonymous, please access the Supplier Alert Line at [www.integrityhelpline.com/hdsuDplier.isp](http://www.integrityhelpline.com/hdsuDplier.isp) or contact the following locations via phone:

## RS Closing Meeting Summary Report

### Important Notice (重要提示):

Please note the CAPA Follow up Process as below:  
请仔细阅读并理解改进措施的具体流程如下:

#### CAPA Plan

1. Within 3 to 5 days after the RS assessment, Service Provider customer service officer will send the Corrective Action & Preventive Action (CAPA) Plan Form to the facility through the mailbox with Service provider as domain name.

在审核后的三到五个工作日内，审核服务商客服人员将通过以审核服务商为域名的电子邮箱将整改预防计划表格发给贵处。

2. Facility shall complete the CAPA Plan within 7 days upon receiving the form and submit the Plan back to Service Provider customer service officer through that mailbox.

贵处应在7天内将整改预防计划表格通过电子邮箱寄回审核服务商客服人员。

3. Service Provider will review the CAPA Plan and if acceptable, will upload it on RS System for THD's final approval within 1 working day. Further cooperation will not be approved till THD has the CAPA plan reviewed and approved via RS system by RS team.

审核服务商将审查贵处提交的整改计划，如果贵处的计划在1个工作日内经审核服务商客服人员审核通过，以便审核服务商客服人员将贵处提交的整改计划上传至审核系统。家得宝公司只将贵处的工作场所的合规性作为审核计划批准的前提条件，只有当审核服务商客服人员审核通过后才会考虑继续合作。

**Note 1:** The completed CAPA plan must follow the SMART (Specific, Measurable, Attainable, Reasonable and Timely) principle and include a detailed explanation of the root cause, how each item is being corrected, how the root cause of the finding will be eliminated, how the progress of each improvement will be tracked, and the date each correction will be complete.

**Note 2:** During the process, if the CAPA Plan is rejected, facility is required to send the revised Plan to Service Provider within 1 working day.

**注意 1:** 完整的整改预防计划必须遵循“具体、可衡量、可实现、合理及及时”的原则，必须详细解释每一个问题的根本原因，将如何纠正，造成问题的根本原因将如何消除，每一个改进如何跟踪，以及每一个改正计划何时可以完成。

**注意 2:** 在审核过程中，如果整改预防计划被拒，贵处应在收到通知后的1个工作日内提交给审核服务商客服人员的整改预防计划。

#### Tiered CAPA Verification

Once the CAPA Plan is approved by THD, THD will move to a three level, risk-based "Tiered CAPA" model as follows:

如果纠正预防计划(CAPA PLAN)被通过，家得宝(THD)将实施一套三个层次，基于风险的“分级纠正预防”模式。具体如下:

**Critical risk-15 days.** The Home Depot RS team is responsible for on-site CAPA verification audit. If critical risk CAPA cannot be closed during the on-site verification visit, the facility will be put into the noncompliance list and future POs may be blocked;

**重大风险-审核结束第15天由家得宝责任采购团队负责现场的纠正预防措施验证审核。**如果重大风险项不能在验证审核中关闭，工厂将被列入“不符合供应商名录”并可能影响后续订单;

**High risk-30 days.** Service Provider is responsible for on-site CAPA verification audit; If all High risk CAPAs cannot be closed during 30 day verification visit, a final warning will be issued and a new verification visit scheduled 30 days later for the service provider to verify all open high risk CAPAs

have been closed. Note that all related audit cost will be charged to supplier. If any High risk CAPAs still cannot be closed, the facility will be put into the noncompliance list and future POs may be blocked;

**高风险-纠正预防计划获得批准日起第30天由审核服务商进行现场的纠正预防措施验证审核。**如果高风险项不能在验证审核中关闭，工厂将被再给予额外30天的延长期。家得宝委派的审核服务商将在30天后再次回访验证高风险项的关闭情况。

**相关审核费用将由供应商承担。**如果高风险项仍未关闭，工厂将被列入“不符合供应商名录”并可能影响后续订单;

**Medium risk-90 days.** Service Provider is responsible for on-site CAPA verification audit; If all Medium risk CAPAs cannot be closed during 90 day verification visit, a final warning will be issued and a new verification visit scheduled 30 days later for the service provider to verify all open Medium

risk CAPAs have been closed. Note that all related audit cost will be charged to supplier. If any Medium risk CAPAs still cannot be closed, the facility will be put into the noncompliance list and future POs may be blocked;

**中风险-纠正预防计划获得批准日起第90天由审核服务商进行现场的纠正预防措施验证审核。**如果中风险项不能在验证审核中关闭，工厂将被再给予额外30天的延长期。家得宝委派的审核服务商将在30天后再次回访验证中风险项的关闭情况。

**相关审核费用将由供应商承担。**如果中风险项仍未关闭，工厂将被列入“不符合供应商名录”并可能影响后续订单;

**Note: 100% On-Site CAPA Verification [Tier CAPA verification as above mentioned].** Suppliers need to provide accurate and complete evidence for each point in every finding at least 7 business days before on-site verification and identify the evidence with a specific document/picture name to match the deficiency. If suppliers fully meet this requirement, there may be an opportunity to waive the on-site verification based on risk level and nature of the finding. The THD RS team will make all final decisions on waivers.

**注意:** 纠正预防措施需要100%现场验证(如上所述的分级纠正预防措施验证)。供应商需要在距现场审核至少7个工作日之前向审核服务商提交准确和完整的整改证据，并且证据包含的文件和图片要有明确的命名匹配每个问题点。如果供应商能够完全满足

这个要求，那么将有机会根据风险等级和问题性质取消现场审核。THD RS团队会做是否取消审核的最终决定。

In case of any issues related to audit quality or judgment disagreements, you are encouraged to contact directly with THD RS team by sending email to "31cc8f@homedepot.com" or "Cathy\_Cao@homedepot.com".

如果贵公司对评审质量、评审结论或评审判断有不同意见，欢迎直接与THD RS团队联系。联系电话: 31cc8f@homedepot.com或Cathy\_Cao@homedepot.com

In the space provided below, we sign our name adding our company stamp to acknowledge that Service Provider auditor has communicated to us the above information and we are now clearly aware of the CAPA Follow up Process.

我们在下方签字并盖章，确认审核服务商审核员已向贵处传达上述信息。贵处已清楚知晓关于整改改进的具体流程。

家得宝公司只有在工厂的社环责任改善预防计划审核合格后才会考虑继续合作进程。

Question	Risk Level (Critical/High/Medium)	Rating (PC/NC)	Findings	Root Cause	Supplier/Factory Corrective Action Plan	Supplier/Factory Preventive Action Plan	Responsible Person	Estimated Completion Date	Contact number / E-mail address	Action Plan Submitted by
5. 07	Medium	NC	According to the review of 10 employees' attendance records and wage records of January 2017, auditor noted that all 10 employees were not paid 3 to 4 days downtime wage in January 2017.	Due to employees were arranged to enjoy the CNV holiday from Jan. 24 2017, and most of the employees were calculated by piece rate, so all the employees were not paid the downtime wage for those four days.	1. We will pay the 10 workers at least the legal minimum wage for those 4 days on March. 2. Factory will improve payment rules to ensure all employees including piece-rate employees will be paid downtime wage. 3. Factory will notify all workers on payment changes.	1. Factory HR team will ensure they continue updating the relations on wage payment of Guangdong Province as increases occur. 2. Factory HR team will conduct a sample audit of workers' payroll monthly to ensure all workers are paid at least the legal minimum wage.	Miss Xu	3/31/2017	ABC@sina.com.cn	
6. 02	Medium	NC	Total 150 workers 20 samples be reviewed, the peak month for factory is from June to December. 1). 10 out of 10 workers' wage and time records NDT compliance, monthly overtime were 50 - 60 hours in July 2017 (the most recent month). And the maximum daily overtime were up to 4 hours. 2). 5 out of 5 workers' wage and time records NDT compliance, monthly overtime were 56 - 60 hours in June 2016 (the peak month). And the maximum daily overtime were up to 4 hours. 3). 5 out of 5 workers' wage and time records compliance, monthly overtime were 18 - 26 hours in May 2017 (the random month). The maximum weekly working hour (normal plus overtime) was 80 hours/week in June 2017 (peak month).	1. No OT control policy and procedure. 2. New orders are increased too much and labor shortage. 3. New employee are not supplied in time. 4. Employees' awareness of time control is not strong	1. The factory establish Time Control Procedures and Policies 2. Factory will forecast PD status one month in advance and optimize production arrangement, prepare in advance. 3. HR team will analyze the factory's worker shortage based on production needs, and hire more workers or buy production machine accordingly to reduce workers' overtime work time. 4. HR and production team will enhance workers skill to improve efficiency;	1. Post the Working Hours Control Procedures and Policies in the publicity column. Production managers and personnel staff must receive training and examination to ensure full understanding of working time control procedures and policy. The training for new employees must be done within a week of starting. 2. The factory HR team will analyze labor demand together with the production team every month, and hire more new workers as needed. 3. Factory production team will forecast the monthly production plan in advance and control overtime accordingly. 4. Factory HR team will audit workers time cards to track workers' working hours; 5. Factory management will have a regular meeting to review root causes of excessive overtime and setup further improvement actions	Miss Xu	3/31/2017	ABC@sina.com.cn	
9. 28	Medium	PC	Missing pre-service, in-service and job leaving occupational health checkup for employees who contact occupational hazards such as high noise and chemicals.	1. Lack of employees' periodical occupational health examination Procedures and Policies 2. Lack monitoring and tracking for employees' periodical occupational health examination Procedures and Policies implementation 3. Employees' awareness of employees' periodical occupational health examination is not strong	1. The factory establish employees' periodical occupational health examination Procedures and Policies 2. The employees' periodical occupational health examination Procedures and Policies training for employees. 3. Establish an effective monitoring and tracking system for employees' periodical occupational health examination Procedures and Policies	1. Policies and procedures: the personnel manager is responsible for the establishment of the procedures and policies of the Employees' Periodical Occupational Health Examination. The contents of the Employees' Periodical Occupational Health Examination will include the requirement of wearing earplugs for the employees who are exposed to noise and the awareness training; 2. communication: to deliver a written about the Employees' Periodical Occupational Health Examination procedures and policies to the ministry of personnel and management personnel, director of security and management personnel must accept training and examination to ensure full understanding to carry out work in the future; For new employees at publicity column post staff Employees' Periodical Occupational Health Examination and for new hires within a week, have knowledge training for Employees' Periodical Occupational Health Examination, strengthen and regular physical examination staff awareness training and communication between employees; 3. Training and skills: the manager of the personnel department establishes the internal trainer of the Employees' Periodical Occupational Health Examination, and the training of the staff is required to train the staff; The personnel manager shall train the staff in the form of collective training every 6 months; 4. Monitoring and tracking: the personnel manager organization established a monitoring and tracking the team.	Miss Xu	3/31/2017	ABC@sina.com.cn	
9. 27	High	PC	It was noted that 3 viewed bending employees and one punching employee were not wearing the provided ear-plugs and two polishing employees were not wearing the provided goggles while operating.	In front of the workshop, no one is responsible for supervising the wearing of protective articles on the spot, resulting in the fact that employees are not wearing protective equipment	The workshop director immediately requested on-site stamping of the post staff (Huang Xihui) wearing earplugs, polishing workshop personnel (Chen Huayang, Yang Zhengxi) wearing goggles	1. workshop supervisor is now in front of the switch machine, posting (wearing protective equipment identifier) 2. stamping and grinding production staff training "PPE wear"; 3. the company shall appoint supervisors as protective equipment and inspection personnel, and not on a regular basis whether the staff wear protective goggles and earplugs	Miss Xu	3/31/2017	ABC@sina.com.cn
